

FLUSH OUT MORE SALES OPPORTUNITIES

Therma-Tru® Flush-Glazed Exterior Doors and Wide-SDLs Available from Huttig®

With the introduction of several new Therma-Tru® products over the past couple of years—like 8'0" ¾-lite Smooth-Star, Shaker-style, Wide-SDLs and Privacy & Textured Glass—Huttig® now offers a wide offering of flush-glazed doors around the entire house.

Therma-Tru flush-glazed doors fit a wide variety of architectural styles, and with a wider view outside and more light inside, you can sell customers a lasting look with clean lines and the long-term performance benefits of flush-glazed construction:

- Factory-built, seamless construction
- Eliminates the need for a lite frame and screw plugs
- Replicates traditional wood door construction
- Polyurethane foam core surrounds the glass and provides durability and strength, eliminating pathways for air and water
- Dual adhesive weather seal provides high-performance protection inside
- Black tape provides a clean sight line and prevent finish weep between the door and glass

As customers look to you for more whole home solutions in exterior doors, look to Therma-Tru for on-trend flush-glazed options that bring in the light and offer more sales opportunities.

Contact Huttig to learn how Therma-Tru flush-glazed doors can help you flush out more sales opportunities!
